FASERFIX® SUPER

Drainage channels for extreme loads and high dynamic forces.

1 Requirements

Drainage channels in heavily traffic areas must:

- withstand extreme loads and high dynamic forces
- be particularly stable to ensure long-term security
- be resistant to environmental influences/effects (frost, heat, moisture)

2 Application areas

- traffic areas for industry
- container terminals and ports
- roads and tunnels
- petrol stations and service areas
- airports

3 Solutions

FASERFIX SUPER channels offer solutions for any type of application in heavy duty traffic areas:

- channels made from fibre-reinforced concrete
- corrosion-proof galvanised steel angle housing
- gratings up to Class F900 in accordance with DIN EN 1433
- grating securely located in 40 mm deep angle housings
- nominal sizes from 100 to 500 mm each in different heights
- bolt-less locking system SIDE-LOCK with additional eight bolt fixing per metre = 16 point locking system
- safety joint for easy sealing

4 Bespoke modifications

- All channels and grating can be cut to a specified length or mitred.
- Channels can be cut to gradients and outlet holes drilled as required

A selection of Hydraulic Performance tables for the most popular sizes of FASERFIX® and RECYFIX® channels including the RECYFIX® MONOTEC and RECYFIX® HICAP® ranges are available on request in an 8 page hard copy or PDF publication.

Hauraton channel drainage configurations are designed and sized using in-house **Hydraulic design software**. The accuracy of the software has been verified by physical testing of Hauraton systems within a hydraulic discharge test flume, replicating and evaluating hundreds of flow scenarios.

Hydraulic design software is also available free of charge to industry professionals. Intuitive and user friendly, **Hauraton Design Software** allows engineers to create drainage schemes for the company's range of civil engineering systems on tablets, desktop computers or through the internet (web-based application).

For smaller projects where a quick indication of the appropriate channel size and system is required for a given catchment area, Hauraton can provide their **Hydraulic Design App**.

For further details contact the Hauraton Technical Support Team

FASERFIX® SUPER channels

Features & Benefits

High quality angle housing

- 40 mm deep angle housing and grating
- Integral legs cast into housing frame provide an extremely stable anchor between the angle housing and concrete side wall
- 8-point SIDE-LOCK (see below) grating plus additional 8 bolt fixing = 16 point locking system
- Anti shunt feature

= Security

SIDE-LOCK

- SIDE-LOCK bolt-less locking system with additional 8-bolt fixing providing extra protection against horizontal movement
- Replace and insert the grating without any special tool

= Security

KTL corrosion resistant finish

Where it is desirable to prevent oxidation on ductile iron gratings and maintain the original black appearance, then a KTL corrosion resistant barrier can be specified. Usually KTL is only needed when the gratings are occasionally trafficked or they are in a pedestrian area.

Test results for corrosion and wear resistance are available on request.

= Maintained appearance

High-tech material

- Centralised production = one quality control system.
- Fibre Reinforced Concrete (FRC) gives optimum strength
- Adheres well to foundation concrete
- One channel for all loading classes up to F 900
- Fire resistance class A1 (non flammable) according DIN 4102
- Installation for asphalted surface up to class E 600 without concrete stretcher

= Security

High stability

- FASERFIX SUPER channels are ideal for areas with heavy load and high dynamic forces up to class F 900
- Maximum lateral stability
- Thicker walls (compared to FASERFIX KS) for additional security in extreme situations (with high dynamic forces)

= Security

FASERFIX® SUPER Applications

Drainage channels for extreme loads and high dynamic forces.

FASERFIX SUPER channels meet the requirements of DIN EN 1433 and are suitable for the following load categories:

Category A 15,
Load class 15 kN

Category B 125,
Load class 125 kN

Category C 250,
Load class 250 kN

Category D 400,
Load class 400 kN

Category E 600,
Load class 600 kN

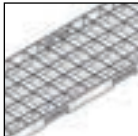

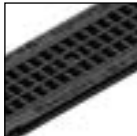

Category F 900,
Load class 900 kN

- 1** Fibre-reinforced concrete channels to DIN V 19580/ EN 1433, CE-compliant, with safety joint, steel frame and SIDE-LOCK boltless locking mechanism as well as tongue and groove for exact installation
- 2** Numerous grating options
- 3** Trash box with drainage connection options on 3 sides and removable mud bucket
- 4** End caps with and without outlets
